- Duration: 5-6 hours /class
- Frequency: Twice weekly
- Tutors: Edge Plus licensed pharmacists team

Prerequisites:

- Bachelor of Pharmaceutical Science from a recognized pharmacy school
- Submitted the list of required documents and accepted by the PEBC (The Pharmacy Examination Board of Canada).
- For US professional undergrads.: a degree in pharmacy accredited by the Accreditation Council for Pharmacy Education (ACPE), and they may apply directly for the Qualifying Examinations after having their documents assessed and approved by PEBC.

Course Description:

'Passionate for SUCCESS' course curriculum serves as a very useful guide for the content of the current education pharmacy school curriculum in Canada. This course will provide the essential techniques and required skills to help you in writing the Pharmacist Evaluation Exam (EE). This is the first step in the pharmacy board licensure pathway in Canada, in order to get fully licensed and be able to practice and work in the local Canadian market.

The course provides the essential knowledge in the fields of: pharmaceutical sciences, biomedical sciences, pharmacy practice (clinical sciences & professional practice skills), behavioral, social and administrative pharmacy sciences.

Learning Outcomes:

- Recognize the fundamentals of biochemistry, metabolism of different macronutrients, biochemical significance of hormones and how the human body is structured and is functioning.
- Understand the molecular basis of cell regulation and the recent advances in the field of molecular biology and genetic information in life forms.

- Establish a comprehensive overview of the immune system, immune responses, study of vaccines, monoclonal antibodies and their clinical applications.
- Develop sufficient knowledge of the role of biopharmaceutics, pre-formulation, physical pharmacy in the development of safe, stable and effective dosage form.
- Master the pharmacokinetic and biopharmaceutic concepts and their therapeutic monitoring.
- Develop basic pharmacological knowledge of the key therapeutic areas
- Form a framework for understanding of the toxicological problems, therapeutic approaches of different diseases, patient care process and professional practice skills.
- Master the basic values that articulate the ethical foundations to provide effective patient care while getting acquainted with the different provincial & federal pharmacy regulations in Canada.

Passionate for SUCCESS is a comprehensive course that prepares the candidates with a solid foundation hence enabling them to advance to the next milestone of their licensures' roadmap i.e. Qualifying Exam part I & II, before being fully licensed and registered in Canada.
